Once, there were two little mice. One of the mice was a very hard worker. Every morning she would go outside and fill her basket with beans and nuts. If she was feeling sick, she would still gather food.

The cousin of the hardworking mouse was the opposite. She slept half the day, played and ate her beans and nuts. Soon she **realized** and became aware of the fact that she would not have any food left for the long winter. She went to her hardworking cousin and asked for food. "Why don't you have any food," the hardworking mouse asked. "I've been busy playing and sleeping", the lazy mouse said. "Well, here's a basket, stop being lazy and gather some food for yourself," said the hardworking mouse.

While the lazy mouse was gathering food, she came across a grasshopper playing happily in the fields. "Hey mouse," said the grasshopper. "Come and play with me instead of wasting your time gathering food!" "I only have a few days to collect food," said the lazy mouse. "You should be gathering **some** too." "Oh please," said the grasshopper. "I have **plenty** of grass, corn and leaves, I'd rather have fun." The lazy mouse said goodbye and continued to gather her own food.

A few weeks later, the lazy mouse came across the grasshopper looking very weak and hungry. "You should have thought of winter," said the lazy mouse. Then she went on her way feeling proud and happy. (244 words)

Reading comprehension (2)

Read the following text, then answer the questions below:

Have you ever heard the sound of a hummingbird? They make a buzzing noise when they fly. They make this noise because they beat their wings so fast. They fly in a **unique** way. They move their wings so fast that they can **hover** in the middle of the air, like a helicopter. Sometimes they hover upside down. They are the only birds that can fly backwards.

Hummingbirds are small. The bee hummingbird, which is a type of hummingbirds, is the smallest bird in the world. It is just a little bit bigger than a bee. Bee hummingbirds build tiny nests.

Hummingbirds move fast. It takes lots of energy to move as fast as they do. This means they need to eat a lot of food. They have to store enough food energy to survive through the night. Their favourite food is nectar, a sweet liquid found in some flowers. Hummingbirds don't use their long beaks for drinking nectar, they use their tongues. **Their** long tongues work like little pumps. They visit hundreds of flowers daily.

Hummingbirds help flowers too. They get pollen on their heads when they feed. Flowers use pollen to make seeds. Hummingbirds help pollen get from one flower to the next. This helps flowers make more seeds. More seeds means more flowers. More flowers means more food for hummingbirds. Isn't it nice how that works out? (230 words)
